

**LEVO has been assigned HCPC coding for our power driven/power standing C3.**

We now have the K0856/K0861 (Group 3) code.

This will allow dealers to:

1) Request funding for the power base

Then,

2) Separately request funding for the E2301 power standing feature.

Utilizing this K0856 code, you can also add one of the other features *TILT*, *RECLINE*  
or *Power Elevating Leg rest*

Note that when more than one feature is chosen, dealers are instructed to use the K0861 code
